Journal of Forestry Research

Background Information

Journal of Forestry Research (JFR), a quarterly journal published by Northeast Forestry University, Ecological Society of China and Springer-Verlag GmbH and cooperated with Jilin Academy of Forestry and Liaoning Academy of Forestry, started publication in 1990.

JFR, as an international science journal in forestry, is attracting great attention from forestry scholars around the world. At present, around 80 percent of the papers published in JFR are submissions from international researchers, covering more than 50 countries. The JFR has been indexed & abstracted by 17 international literature databases, such as Chemical Abstracts, BIOSIS Previews, CAB International, and Abstract Journal of VINITI(AJ), as well as many Chinese literature databases. All the papers published in the Journal can be searched at <http://link.springer.com>. The article citation, utilization, and impact factor of JFR have been increasing year by year.

Aims & Scope

Aims: This publication is intended primarily as a medium for reporting original research, both theoretical and experimental, on forest ecology and forest resource science, although technical reviews, technical notes, and short communications are also included. All submissions to JFR will be subjected to strict peer review. In addition, this publication also bears the mission of introducing Chinese academic achievements to the world scene, by demonstrating the unique features and special status of the Chinese forestry investigations.

Scope: The subject areas featured include all branches of forestry, both pure and applied, such as *Forest management, Tree breeding, Silviculture, Forest ecology, Landscape ecology, Forest soil, Forest disease and insect, Wildlife ecology and management, Biology engineering and technology, Wood science, Forest engineering.*

Submission of Manuscript

Manuscripts for publication should be submitted to Journal of Forestry Research through "Editorial Manager" system for online submission and online review (<http://www.editorialmanager.com/jfr/>). We will send your paper to reviewer through "Editorial Manager" system. Authors can also track the status of your paper through this system. Authors are asked to state the name and addresses of two persons who are qualified to act as referees. The senior author should also list his or her telephone and fax number and e-mail address on the manuscript and in any correspondence.
