

1. Power Management in Data Centers: Cost, Sustainability, and Demand Response	1
Thant Zin Oo, Nguyen H. Tran, Choong Seon Hong, Shaolei Ren, and Gang Quan	
1. Introduction	3
2. Cost Minimization in Data Centers	7
3. Sustainability: Water Efficiency	13
4. Sustainability: Exploiting Temporal Diversity of Water Efficiency (WACE)	18
5. Sustainability: Optimizing Water Efficiency in Distributed Data Centers (GLB-WS)	24
6. Demand Response of Geo-Distributed Data Centers: Real-Time Pricing Game Approach	30
7. Demand Response of Colocation Data Centers: A Reverse Auction Approach	39
8. Conclusion and Open Challenges	48
Acknowledgments	49
References	50
About the Authors	55
2. Energy-Efficient Big Data Analytics in Datacenters	59
Farhad Mehdipour, Hamid Noori, and Bahman Javadi	
1. Introduction	61
2. Datacenter and Cloud Computing	62
3. Handling Big Data on Cloud-Based Datacenters	66
4. Energy Efficiency in Datacenters for Big Data Analytics	78
5. Trends for the Big Data Analytics in Cloud-Based Datacenters	90
6. Summary	94
References	95
About the Authors	100
3. Energy-Efficient and SLA-Based Resource Management in Cloud Data Centers	103
Altino M. Sampaio and Jorge G. Barbosa	
1. Introduction	104
2. Energetic Characterization of a Data Center	107

3. Cloud Computing Environments	116
4. Constraints to Energy Efficiency in Cloud Data Centers	123
5. Current Resource Management in Cloud Data Centers	132
6. A Practical Case of Energy-Efficient and SLA-Based Management of Resources	141
7. Conclusions and Open Challenges	151
References	152
About the Authors	159
4. Achieving Energy Efficiency in Datacenters by Virtual Machine Sizing, Replication, and Placement	161
Hadi Goudarzi and Massoud Pedram	
1. Introduction	162
2. Related Work in Datacenter Power and Resource Management	166
3. System Model	175
4. Problem Formulation	179
5. Proposed Algorithm	182
6. Simulation Results	188
7. Conclusion and Future Research Direction	194
References	196
About the Authors	199
5. Communication-Awareness for Energy-Efficiency in Datacenters	201
Seyed Morteza Nabavinejad and Maziar Goudarzi	
1. Introduction	202
2. Power Consuming Components in Networks	204
3. Energy Reduction Techniques	205
4. Our Approach	221
5. Problem Formulation and Algorithms	223
6. Experimental Results	230
7. Conclusion and Future Work	248
