CONTENTS

Contributors

1. The Many Facets of Individual Differences in Working Memory Capacity **1**

Nash Unsworth

1. Introduction 2
2. Importance of Working Memory 2
3. A Theoretical Framework for Working Memory Capacity 5
4. Multiple Facets Influence Individual Differences in Working Memory Capacity 7
5. Measurement of Working Memory Capacity 32
6. Heterogeneity of Working Memory Capacity Limitations 36
7. Conclusions 37

References 37

2. An Exemplar-Retrieval Model of Short-term Memory Search: Linking Categorization and Probe Recognition **47**

Robert M. Nosofsky

1. Introduction and Background 48
2. The "Core" Version of the Formal Model 50
3. Short-term Probe Recognition in a Continuous-Dimension Similarity Space 54
4. Short-term Probe Recognition of Discrete Stimuli 58
5. A Power Law of Memory Strength 62
6. Bridging Short-term and Long-term Probe Recognition and Incorporating the Role of Previous Memory Sets 64
7. Evidence for a Joint Role of Categorization and Familiarity Processes 76
8. Summary and Conclusions 80

Acknowledgments 82

References 82

3. Hybrid Causal Representations **85**

Michael R. Waldmann and Ralf Mayrhofer

1. Introduction 86
2. Frameworks of Causal Reasoning 87
3. Hybrid Causal Representations 95

4. Case Studies 99
5. Conclusion 122
Acknowledgment 123
References 123

4. Increased Wisdom From the Ashes of Ignorance and Surprise: Numerically-Driven Inferencing, Global Warming, and Other Exemplar Realms 129

Michael Andrew Ranney, Edward L. Munnich and Lee Nevo Lamprey

1. Learning, Wisdom, and Ignorance 130
2. Gauging One's *Numerical* Knowledge/Ignorance Boundaries 134
3. Gauging One's *Mechanistic* Knowledge/Ignorance Boundaries 137
4. (Especially Surprising) Numerical and Mechanistic Information Can Change Minds 140
5. Explanatory Coherence and Numerically Driven Inferencing 142
6. Numerical and Mechanistic Co-influences: Graphs and Statistics Implying Causality 149
7. Using NDI Curricula to Improve People's Analytic Abilities 153
8. Long-Term Conceptual Change As a Holy Grail 157
9. Direct to the Public: Conceptual Change About Global Warming GW 161
10. Five Ways to Increase GW Acceptance Numerically and/or Mechanistically 163
11. A Rising Tide of Germane, Nondeceitful, Information "Lifts All Wisdoms" 168

Acknowledgment 172
Appendices 173
References 178

5. How Retrieval Attempts Affect Learning: A Review and Synthesis 183

Nate Kornell and Kalif E. Vaughn

1. Introduction 184
2. Three Kinds of Evidence 186
3. Why Retrieval Success Might Matter 188
4. Evidence That Unsuccessful Retrieval Improves Memory 189
5. The Two-Stage Framework 192
6. Moderators of the Pretesting Effect 194
7. Does Retrieval Success Even Matter? 199
8. Theories of Test-Enhanced Learning 203
9. Conclusion 210

References 212

6. Prediction, Information Structure, and Good-Enough Language Processing **217**

Fernanda Ferreira and Matthew W. Lowder

1. Introduction 218
2. The Good-Enough Language Processing Approach 219
3. Prediction in Comprehension 223
4. Information Structure: Given Before New 232
5. Putting It All Together: Information Structure, Good-Enough Processing, and Prediction 235
6. Conclusions 240

References 241

7. Separating the Activation, Integration, and Validation Components of Reading **249**

Edward J. O'Brien and Anne E. Cook

1. Introduction 249
2. The RI-Val Model of Comprehension 252
3. Implications of the RI-Val Model 270
4. Conclusions 271

References 272

8. The Politics of Attention: Differences in Visual Cognition Between Liberals and Conservatives **277**

Michael D. Dodd, John R. Hibbing and Kevin B. Smith

1. Introduction 278
2. Background 278
3. How Does Enhanced Physiological Reactivity Manifest in Terms of Basic Cognitive Behaviors? 280
4. Look Into My Eyes and Tell Me What You See 285
5. Emotion Processing 293
6. Political Temperament Does Not Interact With Everything 302
7. Summary and Takeaway 303

References 304
