

Advances in
COMPUTERS

Volume **108**

Edited by
ATIF M. MEMON

Series Editors

R. HURSON and Atif M. Memon

CONTENTS

<i>Preface</i>	<i>vii</i>
1. Model-Based Testing for Internet of Things Systems	1
Abbas Ahmad, Fabrice Bouquet, Elizabeta Fourneret, and Bruno Legeard	
1. Introduction	2
2. Challenges of Testing IoT Systems	4
3. State of the Art	8
4. MBT for IoT Conformance Testing	17
5. MBT for IoT Security Testing	27
6. Online MBT for IoT Robustness Testing	41
7. Model-Based Testing as a Service	44
8. Lessons Learnt and Discussion	50
9. Conclusion	52
Acknowledgments	54
References	54
About the Authors	56
2. Advances in Software Model Checking	59
Junaid H. Siddiqui, Affan Rauf, and Maryam A. Ghafoor	
1. Introduction	60
2. Explicit-State Bounded Model Checking	63
3. Symbolic Execution	68
4. Abstraction-Based Model Checking	77
5. Conclusions	79
References	81
About the Authors	88
3. Emerging Software Testing Technologies	91
Francesca Lonetti and Eda Marchetti	
1. Introduction	92
2. Basic Concepts of Testing	94
3. Test Cases Generation	100
4. Test Challenges	109
5. Testing Process	115

6. Domain-Specific Testing	120
7. Discussion and Conclusions	133
References	136
About the Authors	142
4. Optimizing the Symbolic Execution of Evolving Rhapsody Statecharts	145
Amal Khalil and Juergen Dingel	
1. Introduction	147
2. Background	149
3. Related Work	164
4. Standard Symbolic Execution of Rhapsody Statecharts	176
5. Optimizing Symbolic Execution of Evolving Rhapsody Statecharts	194
6. Implementation	227
7. Evaluation	241
8. Conclusion: Summary, Future Work, and Perspective	267
Appendix	271
References	274
About the Authors	280
5. A Tutorial on Software Obfuscation	283
Sebastian Banescu and Alexander Pretschner	
1. Introduction	284
2. Classification of Code Obfuscation Transformations	286
3. Classification of MATE Attacks	291
4. Survey of Obfuscation Transformations	294
5. Discussion	332
6. Related Work	338
7. Conclusion	343
References	345
About the Authors	353
